What this free blueprint will help you do

If you already have useful content but struggle to turn it into clean, professional slides, this blueprint will help you get a strong first result—fast.

You will learn a simple process that turns your ideas, notes, or drafts into clearer presentation direction.

Inside this blueprint

- 01 | Prepare your content
- 02 | Give AI the right context
- 03 | Use the starter prompt
- 04 | Review the structure
- 05 | Improve weak output quickly

The complete **DigiBeloved AI Presentation System** adds the **Dynamic Presentation Skill** for even better results.

GIVE AI THE RIGHT CONTEXT

What to provide before asking AI to create your presentation

1. Audience

Who will see the presentation?

Example: senior managers in an energy company

2. Objective

What should the presentation achieve?

Example: explain the opportunity and secure approval

3. Tone

How should it feel?

Example: professional, modern, and executive

4. Brand

What visual direction should it follow?

Example: navy blue, white, and yellow. Clean corporate style

5. Content Control

Verbatim –
preserve my
wording

Refine –
improve
clarity

Optimize –
make it
presentation-ready

The better the context you provide, the more relevant, on-brand, and useful the result will be.

CONTENT

I will provide the content.
Please transform it into a clear, well-structured presentation.

AUDIENCE

The target audience is [insert audience].

OBJECTIVE

The objective of this presentation is to [insert objective].

tone

Use a [insert tone] tone throughout the presentation.

BRAND

Apply a clean, modern, and professional
aesthetic using my preferred brand direction.

CONTENT HANDLING

Use Verbatim, Refine, or Optimize
based on my instruction.

Before creating the presentation

- ✓ Analyze the content and extract key points
- ✓ Identify the main message
- ✓ Organize a clear narrative
- ✓ Avoid overcrowded slides
- ✓ Adapt the presentation to the audience and objective

REVIEW & QUICK FIX PROMPTS

Improve weak output quickly

QUICK REVIEW CHECKLIST

- ☒ Is the text readable?
- ☒ Does each slide have a clear purpose?
- ☒ Are the visuals useful?
- ☒ Is the content accurate?
- ☒ Does it fit the audience?

QUICK-FIX PROMPTS

01**Too Much Text**

Reduce the density. Break this into clearer points or additional slides while preserving the meaning.

02**Design Feels Generic**

Make the presentation more distinctive and professional using stronger hierarchy, better spacing, and more intentional layouts.

03**AI Changed My Content**

Return to verbatim mode. Preserve my wording and only improve structure or design.

04**Too Many Decorative Images**

Replace unnecessary decorative images with visuals that support the message.

05**Feels Too Casual**

Redesign this for a more executive, polished, and professional audience.

Small edits can create a big improvement.

READY FOR THE FULL SYSTEM?
